Historic, Archive Document

Do not assume content reflects current scientific knowledge, policies, or practices.

N THIS SEED BOOK you will find practically every variety of Seeds, Bulbs and Plants for which there is any demand. It is compiled to help the small city gardener as well as those who buy **Seeds in Bulk** to

get the best results at the lowest cost. When in doubt, make your selection from the varieties listed in

BLACK FACE TYPE.

Tested We have a practical testing system and thus know the germination and purity of each variety we offer. We also procure the pedigree of each variety as far as possible, thus we **Comply with the Pure Seed Laws** and are determined to give satisfaction. If any of our Seeds, Bulbs, Poultry Supplies or other goods are not as we represent them, we will consider that you are doing us a favor by telling us about it.

We do not issue expensive catalogs involving thousands of dollars (which the customer indirectly pays for). We are long experienced in the seed business, over a quarter of a century in Colorado, and being a strictly Colorado concern we can serve you very intelligently.

Postage On all Vegetable and Flower Seeds, Bulbs, Plants, etc., **Prepaid** unless otherwise stated. The U. S. Mail delivers our seeds direct to your door. For Grass, Grain and Field Seeds, also other goods that are not priced "prepaid," see Parcel Post Schedule on back of inside cover page.

Our Specialty is SEEDS IN BULK.

Remittances You can send Draft, Money Order, Registered Letter, or small amounts in clean postage stamps. Better not mail coin. If we can not fill your order we refund the Please use our printed Order Blank when possible.

Your That's the height of our ambition and we will go to Success any extremes to make all transactions satisfactory, but you know that there are many causes why good seeds do not always make good crops, owing to weather, heat, cold, insects and other reasons beyond the control of planter and seedsman, we therefore can not guarantee the crop nor give any warranty, expressed or implied, as to their growth, description, quality, or productiveness; and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned in the original, unbroken package, and the purchase price will be refunded.

If any seeds do not prove as represented by us we will replace with more or other seeds.

We always give extra seeds free with mail orders for packets, ounces, etc.

Yours for success,

1515 Champa St. Denver, Colo.

President.

Plant a Plant a Garden Grow More Food

> HE BUG CROP in 1918 was nearly as large as the beet crop, and many persons raised more blisters than beans; but everyone who attempted a war garden got a taste of fresh vegetables, and that started things. This year the bug crop won't be so big-not by fifty per cent.

Why? Because we have all had last summer's experience; and that's all the professional gardener has-experience. He knows when to go after bugs and what to use.

So this year you will want to grow more food, not only for its value in temporarily satisfying that inner craving, but for the fun of it, the outdoor exercise, and to boast about it, and, incidentally, to know that you are saving a little.

A little? Yes. Last year Denver kept tab on her war gardens, and discovered that there were 31,125 of them in the city, or a total of 2,233 acres. The estimated value of this crop was approximately \$2,000,000. This estimate was on a basis of about \$67 per garden, or a per capita return of \$8.12 for every man, woman and child in the city.

The National Home Garden Commission, in estimating the total yield from all the war gardens of the United States last year, com-puted the totals on an average of \$100 per garden.

This booklet was written and compiled to help you. Use it faith-fully, both in the selection of seeds and as a guide in tilling the soil. You will find the various items briefly but thoroly set forth in

a manner easy to understand. Refer frequently to the chart in the center of the book—it will

help you plan and get results.

Many seedsmen this year advanced the packet price to 10c. In accordance with conditions we have repriced all packets. Some we were able to reduce to

3c Per Packet

Others we had to advance to 6c, 7c, 8c, and a few to 10c; but in every instance you get the value of your money in first-class DEPENDABLE SEEDS.

Planning the Garden

Plan your back-yard garden on paper in advance. A little indoor gardening of this sort will enable you to have fresh vegetables thruout the season, and will make the same ground yield two or three crops, instead of the single crop commonly raised in small gardens.

Moreover, such planning will make it possible for you to get the ground ready in time for planting, and to secure your seeds and plant them at the dates which give each variety its best growing conditions.

The planting chart in the center of this book will tell you when to plant successive crops. There is a wealth of information on the center pages, which become more valuable the more you study them.

For example, if you will thus

plan the plot to be devoted to peas, by the time your first crop is harvested the second crop will be in bearing, and the plants of the third well advanced.

 (\bigcirc)

All the tools necessary for indoor gardening, which can be made an interesting recreation for the whole household, are a large sheet of wrapping paper, a ruler, and a pencil. After looking over the garden and selecting the plot of soil best suited for your purpose, measure this, and outline it on paper on a scale of one-fourth or one-eighth inch to the foot.

Next, study this Seed Book to determine what can be grown in your climate under the conditions of exposure, soil, and drainage found in your back yard or vacant lot.

Plant What the Family Wants

Then comes the consultation with the family to determine the sorts of vegetables which the different members like, and which, therefore, they personally will be interested in raising.

The aim of the back-yard gardener should be to raise those vegetables which either are expensive or in which the flavor or quality depends in great measure on absolute freshness. Peas and string or lima beans, to be at their best, should be cooked almost immediately after they are gathered. Peas kept even for a day lose much of their delicate flavor and sweetness. Consequently as much space as possible should be devoted to such vegetables. Other vegetables, in which freshness is not so essential, should largely be used as fillers to keep the ground at work.

Plant Special Vegetables

An effort should also be made to have special vegetables, such as Swiss Chard, of which the

family is fond, and which are difficult to obtain in local markets, and then only at high prices. For your convenience we have put the leading varieties in Black Face **Type.** If you are in doubt, this will help you make a satisfactory selection.

The housewife probably will want a little bed of parsley, mint, sage, or other herbs, not because they are expensive to buy, but because of the convenience of being able to pick a sprig just when it is needed.

Having decided what is to be planted, the indoor gardener draws lines or symbols on his out-

Habits of Plants to Be Considered

In laying out the plan, the owner should consider the amount of each vegetable necessary for a serving for his family. He also should bear in mind the habits of the plants, so as to allow enough space between the rows for their proper growth, for the interplanting of later crops, and for easy cultivation.

The cultivation, of course, is easiest when the rows are one and one-half to two feet apart, as this permits the use of wheel cultivators. lined plan to indicate the different crops, inserting the date when each is to be planted. Where a second or third crop is to follow the same row, or occupy the same ground, this may be written in red or blue, indicating that it is to be planted when an earlier crop is harvested.

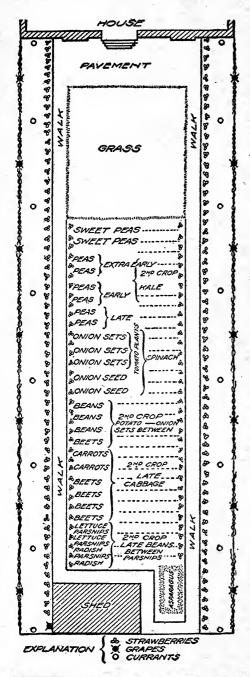

Plants of high growth, and which cause heavy shade, naturally should not be located where they will interfere with sun-loving small plants.

Perennials, such as rhubarb and asparagus, which are not cultivated, should not be grown among plants which call for tilling.

The planning should be extended to the planting of small fruits, such as currants and raspberries, and even to the location of apple, plum, cherry, or other fruit trees.

WHAT "DEPENDABLE GRADE" MEANS

WHILE we endeavor to have all our Seeds, Bulbs, Plants and Poultry Foods dependable and equal to representation in every respect, we have from time to time procured several exceptionally choice strains of seeds, which we put out under our special brand of "Dependable Grade," when as such they are the best obtainable. This also applies to several Poultry Food Mixtures, etc., which have won us many compliments.

PLANS for a Small Garden

this plan all the In vegetables named are planted in rows across inside from the lateral rows of strawberries. As rapidly as each kind of peas matures and the crop is over, kale is planted in its place. The ground to be used for tomatoes is first planted with onion sets, and these onions are used as rapidly as needed. When the time comes to set out the tomatoes, some of the onions are dug to make space for the tomato plants. When the tomato crop is over, the ground is occupied by spinach as the third crop. Spinach is also planted as soon as the bulb onions from the side are gathered. The beans, carrots and peas are succeeded by late cabbage, and between the rows of late cabbage, late onion sets can be planted. Late beans are planted between the rows of parsnips.

Packet and Bulk Price List of GARDEN SEEDS

When Beans, Peas and Corn are wanted by mail, add 5c per pound. We pay postage on all packets, also 1/4-lb. of Beans.

BEANS, GARDEN-Dwarf

Bush Beans should be planted about the last of May. The furrows should be at least two feet apart. A pint of wood ashes should be hoed into every ten feet of furrow, leaving the furrow not more than an inch Plant the Beans four deep. inches apart in the furrow and cover them with an inch of soil. They come up in from one to two weeks, and the plants mature in from six to nine. Thorough tilling is essential; the ground must be kept soft. Thin the plants out to about five inches apart. Avoid handling or touching the vines in damp weather.

[5]

PEAS

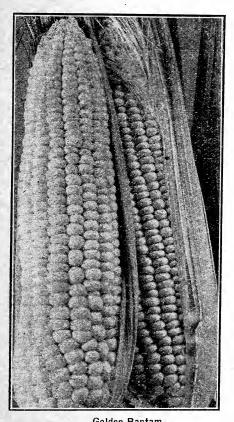

The furrow for Peas should be four inches deep. Sow the seeds one inch apart and cover with one inch of fine soil, thus leaving part of the furrow unfilled above them. This is to be filled gradually with fine soil as the plants grow, until the furrow is filled level with the ground. By this method, the sun can warm through the soil to the roots. Peas can be planted as soon as the frost is out of the ground; the rows should be two and a half feet apart. Plant the climbing varieties near a fence and train them on wire netting.

Corn to be at its best should be eaten within a few hours after it is picked, for its sugar content disappears very rapidly after it is removed from the garden. Beginning as soon as the soil is warm, successive plantings may be made every two or three weeks until late summer.

SWEET CORN

Corn should be planted to the north of the garden, so as not to shade the other crops. It should not be planted in a very small garden unless it is the only crop to be raised. It needs shallow but continual tilling. Just after the middle of May is a good time to plant. The rows should be three feet apart, the kernels sown three together every six inches in the furrow. When the Corn is well started, pull out all but one stalk to each place. Keep the little shoots or suckers cut from around the roots. Corn matures slowly, large cob varieties sometimes requiring three months. The ears are ready to pick when the silk is brown and the kernels on the tip are plump. Never touch the ears of growing corn: it is liable to spoil them.

Postage on Corn is 5c per lb. extra, except on packets and ¼-lb. lots.

ASPARAGUS

Asparagus is a slow grower, requiring at least three years to mature from seed, and is therefore not generally recommended to the small gardener. Usually unless one owns his home it is not a profitable undertaking, and we would recommend, unless you go into asparagus raising on a large scale, that you get the roots in preference to trying to raise from seed. Cultural leafiet on request.

BEETS—Table Varieties

The rows in which Beets are planted should be a foot apart. Along each row, in a furrow or small trench one inch deep, drop the seeds one or two inches apart; then cover them with soil, pressing it down. fine Beets should be planted some time between the first of April and the first of June; they will be from a week to a month coming up, according to the weather. When the plants are about four inches high thin out to from three to four inches apart. The plants pulled up can be planted elsewhere. Strip their outside leaves off, and put the plants in holes deep enough to keep the roots from turning up. Beets should be ready for eating in from eight to twelve weeks. Keep the ground loose and thoroughly tilled.

CAULIFLOWER

ALL OUR DANISH SEED IS GROWERS' FIRST QUALITY SIFTED SEED

For the small garden we advise getting Cauliflower plants in preference to growing from seed. The cultivation is the same as that of Cabbage, except that Cauliflower favors even a moister soil. Proper tilling and watering effects this very much. Cauliflower averages about three months in maturing. Tie the long leaves together over the growing head to keep it white. Plants ready in April. For prices, see page 30.

CABBAGE

The best way to raise Cabbage in the small garden is from the plants. Cabbage requires an abundance of both moisture and tilling. It is also advisable to enrich the ground if possible. Fertilizer may be conserved by placing a small amount under each hill before plants are set. It will pay you to set out both early and late varieties. Set early Cabbage 18 inches apart in row and two feet between rows. Late Cabbage, two feet apart in rows and three feet apart between rows.

CUCUMBERS

Dig holes at least five feet apart. They should be a foot wide and five inches deep. Fill each hole to within an inch of the top with equal parts of sand and well-rotted stable manure thoroughly mixed. Scatter at least ten seeds in it, well apart, and cover them with half an inch of fine soil, pressing it down. From the middle to the last of May is planting time. Thin out to three plants to a hill. Cucumbers grow well near a stone or rubbish heap; the vines will run over it. Hoe near them (but not too deep) as long as the vines will permit.

CELERY

Celery, to be raised from the seed, requires almost expert care. It is better for those who are not practiced gardeners to buy Celery plants. These are set out about the first of June, a foot apart, and mature along the last of September or during the first two weeks of October. - Celery is by nature a marsh plant, and the soil about it must be kept wet, especially while the plants are young. When they get to be about four inches high, shear off the tops; it makes the plants more stately. As the plants grow, gradually draw the earth up around them to keep the stalks white; by the end of fall all should be covered but the tops. A heavy paper wrapped around each stalk will insure tender, white plants. Keep the ground well loosened and cultivated; this is imperative on account of the moisture required by in thre pag

CARROTS

Furrows for Carrots should be fourteen inches apart and from a half-inch to an inch deep. The seed can be sown from mid-April to mid-May; it should be sown rather close, as Carrots do not germinate very well. Thin the plants out to four inches apart when they are four inches high. Soil for Carrots should be particularly well tilled before they are planted. and quite freed from stones.

LETTUCE—All Select SPECIAL CULTURAL LEAFLET ON LETTUCE PREE

Lettuce will stand slight frosts, and is therefore one of the first things possible to plant if the ground is well prepared; early April is not too soon. It can be planted up to the middle of July, and many prefer the later plantings. Place seed in trench half an inch deep, cover with fine soil to top of the trench and press the soil down. The plants should be up in about a week. If head varieties are wanted, thin out to four or five inches. The heads are usually well formed in ten weeks and should then be cut or they will rapidly go to seed, especially in hot weather. The rows of lettuce should be at least a foot apart. The quality of the lettuce depends on the tilling—keep the hoe busy.

MUSKMELON OR CANTALOUPE

Muskmelon planting and cultivation throughout are the same as those used in raising Cucumbers. It is considered rather delicate for northern latitudes, but with care can be successfully grown. The pleasure of raising them is worth the effort.

ONION—From Select Growers

Sow the seed as soon as the frost is out of the ground. The rows should be two feet apart, the furrows half an inch deep. Sow the seed close, pressing the soil down firmly on them. Thin the plants out to three inches apart. Hoeing is the salvation of Onions; if the weeds once get ahead of the young crop, they are death to it. The manure or prepared fertilizer used should be thoroughly mixed with the soil before the seed is sown and the ground should be kept smooth and even over the seed.

PEPPER

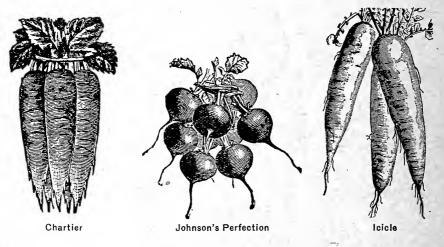

Peppers, like Tomatoes, should be planted in a window garden about the first of March. They are grown and transplanted exactly like Tomatoes, but the plants can be placed nearer one another in the ground, say two feet apart, in rows two and a half feet apart. A dozen good healthy Pepper plants will supply the average family. The plants should be set in rows three feet apart and two feet apart in the rows.

RADISHES

Radishes can be planted very early—as soon as the ground can be worked and there is no danger of frost. The rows should be from eight inches to a foot apart; the furrows for the seeds about half an inch deep; and the seeds, when dropped into the furrow, about an inch apart. Press fine soil down over them to the depth of the furrow. As the plants grow, thin them out like beets. Radishes mature, depending on the kind, in from four to six weeks; the turnip-shaped ones are the earlier.

RHUBARB, OR PIE PLANT

Like Asparagus and Celery, Rhubarb is best bought by nonprofessional gardeners in the form of roots. These are set out in the early spring, three feet apart in the furrow, and in rows three feet apart. Provided there is no standing water, Rhubarb grows well on almost any kind of soil, under ordinary cultivation. Roots ready in spring.

Mammoth Sandwich Island.....\$0.07 \$0.25 \$0.80 \$2.50

TURNIP

Plant Turnips between the first of May and the last of July, in rows a foot apart. A quarter-inch of soil is enough to cover the seed with. The seed should be sown close and the plants thinned out to about five inches apart. Late Turnips are generally considered the best. They should be taken out before the first heavy frost in the fall, and can be packed in boxes of sand to keep all winter.

Book: Squashes, by Gregory, 30c, postpaid.

TOMATOES

Tomatoes are planted indoors in a window garden about the first of March. When the third leaf of a plant has formed, put the plant into a three-inch pot or box. After all danger of frost is over, the plants may be set in the ground. Do not plant Tomatoes within three feet of any other crop. Dig holes three feet apart and deep enough to allow placing the plant an inch or two deeper than it was in the pot. Cover the top of the pot with your fingers, holding the stem of the plant between them; then turn the pot upside down, tapping it with a trowel or other tool, when the plant will easily come out. Place it in the ground, pressing fine earth around it; if the earth is dry, water it as soon as the plants are set. Some people, before transplanting Tomatoes, put a narrow ring of heavy paper loosely around the plant, just at the top of the soil, to keep off cutworms. June 1st is the usual time for transplanting in northern latitudes. Tie the growing plants to stakes. We will have plants ready in May and June.

HYBRIDIZED POTATO BLOSSOM SEED

Much has been published regarding potatoes raised from the Seed Balls. Many have asked for this seed. Thus we have provided a supply of Seed Balls put up in sealed packets.

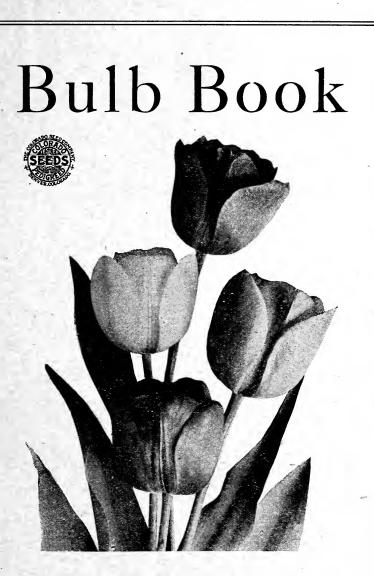

New varieties are often products of Seed Ball plantings. You may be lucky. There are full directions on each packet.

Price: Packet, 15c; 2 for 25c, postpaid. For Seed Potatoes, see page 47.

BALLS ONE-FOURTH SIZE.

Ready In September A list of the best Spring Flowering French and Holland Bulbs, and seasonable seeds for fall planting. If your name is on our mail list, this book will be sent you as soon as issued. Be sure to get this bulb book before ordering your fall bulbs and plants.

FLOWERS IN AFTER-THE-WAR TIMES

OOD WON.THE WAR, but food was not the goal. It was only ammunition. The war was for the souls of people and peoples. And while we raise potatoes and cabbages to feed the flesh, the spirit must not be forced to wait till the second table. The soul should sit at meat along with the body. Shall we banish flowers from our gardens? Can we afford to cut music out of our life's program? Cabbages are of the rank and file of the fighting forces, but Poppies

are the regimental band. Flowers are for solace in the serious business of hoeing Cabbages and killing the worms thereon. Potatoes we need for food, but Pansies we must have for thoughts.

It would be to Germanize our land if we cut gay color out of our gardens and left the gardener only the drab business of serving tables. The wondrous structure of the Cabbage may be worth long meditation; but we do not meditate upon it. The Rose compels meditation. Flowers on the mantel are incense offered to the soul of the housethe home. If Germany had thoroughly subdued America, a home would not have been needed. A house and a cabbage patch would have been sufficient.

As war was a sad business, so the period of reconstruction will As war was a sau busiless, so the period of reconstruction will be a serious one. But it needs no professional landscape crepe-hangers. Dots and dashes, belts and splashes of color, are needed in our landscape more than ever. We owe a whole season of garden cheer to the eye of the passer-by in our neighborhood. Dooryard color is Red Cross bounty. It is first aid to the war-sick mind and broken spirit. By taking thought, the householder can have a succession of color growing about his house from spring frost to autumn frost and color growing about his house from spring frost to autumn frost, and this without subtracting at all from the time he should give to the food garden. The heart will find spare moments for flower culture. Keep the home gardens blooming .- Adapted from the Minneapolis Journal.

Speaking of fertilizing the garden: Good, rich soil promotes rapid growth. The more rapidly vegetables grow, the more tender they will be. Slow growth favors the development of tough, woody fiber. And this is not all. Earliness is everything to the Market Gardener, and is prized very highly by the Home Gardener. This is gained by planting in rich soil.

NASTURTIUMS-Dwarf

Nasturtiums may well be classed among
the handsomest and most showy annuals.
They are of very easy culture and give a

SWEET PEAS

The Sweet Pea is one of the most thankful flowers to be found in any garden. We have discarded all poor and inferior sorts and offer only what we know to be the cream of the list, chosen from personal inspection. Cultural leaflet free on request.

For best results we recommend that all Sweet Pea seeds be inoculated with our "Standard Bacteria." Package, 45c.

named varieties, also many UNWINS and S P E N C E R S, all mixed by us. There is positively nothing better in mixtures.

Large packet, 5c; oz. pkg., 15c; 2-oz. pkg., 25c; ¼-lb. pkg., 40c; ½-lb. pkg., 65c; lb. pkg., \$1.25. . All postpaid.

GIGANTIC POPULAR SPENCER VARIETIES

This list includes the very choicest of the popular varieties. There are many similar kinds in Sweet Peas with attractive names, but you cannot go amiss in planting any of the following. The stock is all from reliable growers in California who grow on contract for leading seedsmen. Our prices are very reasonable for the stocks we supply.

Prices: Packets, 5c; ½-oz. pkg., 15c; oz. pkg., 30c; ¼-lb., \$1.00.
Apple Blossom, bright rose, wings primrose; bi-color.
Asta Ohn, soft lavender suffused with mauve.
Beatrice, rich pink, beautifully waved.
Captain of the Blues, clear purplish blue with blue wings.

Countess Spencer, soft, rosy pink; one of the best. Elfrida Pearson, light blush pink; margins darker. Florence Nightingale, a true lavender; very beautiful. Illuminator, rose with brilliant salmon orange. King Edward Spencer, rich carmine scarlet; best red. King White, a grand new white; extra large. Marie Corelli, a splendid glowing crimson. Mrs. Routzahn, apricot, pink and straw color. Mrs. Walter Wright, deep mauve; large, shell shaped. Othello Spencer, deep rich maroon; very dark. Primrose Spencer, beautiful cream yellow; large and wavy. Prince of Wales, crimson with tint of cherry; shell shaped. Queen Victoria, opens blush then turns primrose. Queen Alexandria, rich bright scarlet; large. Rosabelle, rich rosy carmine; large. Senator Spencer, chocolate and brown striped on white. Thomas Stevenson, bright orange scarlet. White Spencer, pure white, waved flowers; always good. Wedgewood, wedgewood blue; beautiful.

SPENCER VARIETIES MIXED

The Silver Medal strain with additional named varieties added. Can't be beat.

Packet, 5c; oz., 20c; 2-oz. pkg., 35c; 1/4-lb., 65c; lb., \$2.00.

EARLY FLOWERING ORCHID FLOWERED

Earliest and remain in bloom longest. It will pay you well in beautiful blooms by buying liberally from this list.

Per packet, 15c; ½-oz., 75c.

Early Heather Bell, rich mauve to mauve lavender.

Early Liberty, sun-proof crimson or blood red.

Early Morning Star, deep orange scarlet.

Early Meadow Lark, rich cream; well waved.

Early Mist, white, flushed mauve.

Early Snowflake, pure white, large waved.

Early Song Bird, pink with white background.

Early. Songster, a splendid lavender; one of the best.

Early Warbler, rich mauve purple; good form.

Early Yarrowa, opens a rose, changing to pink.

STANDARD GRANDIFLORA VARIETIES

All are large flowering and best of their class. Prices for any of the following from named varieties:

Oz. pkgs., 10c; three 1-oz. pkgs. for 25c; 1/4-lb. pkg. for 30c.

The Grandiflora named varieties are of good colors and have many distinct shades. They are excellent for planting in quantities where color effect is wanted. We omit the names, but give distinct colors separate, as follows: White, Scarlet, Pink, Maroon, Lavender, Blue, Purple, Salmon.

GRANDIFLORA MIXTURE

As furnished by the grower. Grown mixed. Pkt., 3c; oz. pkgs., 10c; 2-oz. pkgs., 15c; ¼-lb. pkg., 25c; ½-lb. pkg., 45c. All postpaid.

STANDARD INOCULATING BACTERIA FOR SWEET PEAS

For best results in getting strong color in the blooms, also for early blossoms, and many of them, be sure to inoculate the seed with "Standard Bacteria." It is very easily done and inexpensive. A 45c bottle is enough for home garden; 75c will buy enough for one acre. Ask for circular.

NURSERY AND GREENHOUSE DEPARTMENT

We have excellent facilities for supplying goods in this line. Let us book your orders early and ship the stock as wanted. No extra charge for packing.

VEGETABLE PLANTS

Our facilities are unequaled in Denver for ability in supplying strictly firstgrade plants. Our stocks are true to name and properly cared for. Our prices are right for dependable plants. We are not competing with cheap, haphazard lots. Prices do not include postage except where so stated. If must be sent by mail, add 5c per dozen, 25c per 100.

We do not favor sending any vegetable plants by mail. It is difficult to keep them in good condition in a mail pouch; express is best.

SMALL FRUITS NOT PREPAID

These varieties are all of established merit, homegrown and very suitable for our Western planters. When shipping by freight or express we can select the larger and stronger plants. Special Cultural Leaflet on Small Fruits free.

STRAWBERRIES

Strawberries are a hardy plant; they do well in almost any soil or climate, and are not much given to disease, nor over-esteemed by bugs. Newly turned sod land, however, is not recommended for them. They grow exceptionally well on land previously used for corn, tomatoes or other well-cultivated vegetable crops. Buy one-year-old plants, as near home as you can, and get them into the ground as soon as you can after you buy them. Strawberry plants advertised as cheap are cheapest when let alone; buy good ones. Before planting, dip the roots in water. Set the plant with the crown or bud at the surface of the ground. If it is under the ground, the plant will not grow; if it is too high, the plant will dry up and die. Cover the plants with cut grass and brushwood from the first of December to the first of May. During the year each plant sends out runners, which grow new plants for the next year. These are to be separated from the parent plant as soon as well rooted.

CHOICE FRUIT TREES

Our No. 1 stock of Fruit Trees average too large to be handled satisfactorily by mail. Should go by express or freight. We make no charge for packing.

Prof. Green's Book, "Amateur Fruit Growing," 140 pages, cloth cover, for 25c, postpaid, is worth having.

Special Cultural Leaflet on Standard Fruits free.

APPLES

Prices: All varieties except crab, average No. 1, 5 to 6 ft., each, 40c. Delicious, large, dull, dark red; very juicy; one of the best. Gano, very hardy and suitable for the West. Grime's Golden, good size, yellow color; good keeper. Greening, Northwest, a popular winter variety. Jonathan, red color, medium size, extra quality; very popular. Winesap, Stayman, large, deep red; excellent keeper. Northern Spy, greenish yellow, striped; late. Red Astrachan, large, deep crimson; for summer only. Yellow Transparent, white, tender; early summer. Siberian, Crab, large red; exceedingly hardy. Each, 50c.

SMALL APPLE TREES BY MAIL

We have arranged with a Nurseryman in Missouri to supply by mail good young trees. He selects standard varieties and delivers them prepaid direct to you from the Nursery.

10 APPLE TREES FOR \$1

Send us the One Dollar and we do the rest.

CHERRIES

Prices: All varieties, average No. 1, 4 to 5 ft., each 40c. Early Richmond, clear, bright red, very early; quite acid. Montmorency, large, best sour red; very hardy and productive. Royal Ann (Napoleon), large pale yellow, sweet.

INSPECTION—Our Fruit Trees are all properly inspected by the State Entomologist and a proper certificate of inspection accompanies each shipment.

6

PEARS

We do not encourage planting Pears in this part of Colorado. However, we can supply popular varieties at 50c each.

PLUMS

Our varieties are suitable, even for the dry farmer's crop. Prices: All varieties of select trees, average 4 to 5 ft., each 45c.

Abundance, large, bright red; firm and sweet.

Damson, Shropshire, deep purple; fine for preserves; popular.

German Prune, large, dark blue; excellent for preserving.

Improved Wild Goose, bright red, sweet; very hardy.

QUINCE

Our 2-year-old trees are 3 to 4 ft., well branched; each, 50c. Orange, golden yellow flesh, good flavor; reliable.

MULBERRY

The Russian Mulberry of properly grafted stock produces good fruit, and usually in abundance, with but slight attention. Our trees now are 5 to 6 ft., large and vigorous; each, 40c.

When other Fruit Trees or any kind of Nursery Stock is wanted, you will do well to send us a list for estimate before you purchase.

SHADE TREES

We offer strictly COLORADO GROWN Shade Trees that are sure to please. They are well rooted, shapely and dependable. Note our low prices for stock ready to plant.

WHITE ASH, SILVER MAPLE AND ELM

PLANTING TABLE FOR THE HOME VEGETABLE GARDEN

The Home the Home									
Kinds	Suitable Varieties	Times of Planting for best results	Time to first maturity (days)	Distance between plants (inches)	Detween	of seeds	Amount of seed for 100 feet row	Depth to plant (inches)	•
Beans	Stringless Green Pod, Golden Wax Egyptian, Early Blood	May-June	50- 70	3-5	24-36	8-12	1 pound	1-2	For successive crops, sow every two weeks,
Beets	Turnip	April-June	60-90	2-3	12-18	20-40	2 ounce	1-1	Sow early varietics every two weeks. I'se when small and tender.
Cabbage (Plants)	Early Winnigstadt, Hollander	April-June	45-100	18-24	24-30		1 packet	3-1	Put collars on plants to protect from cut worms.
Carrot	Danvers, Oxheart	April-May	60-100	2-4	12-18	30-60	1 ounce	<u>1</u> -1	For continuous erop, sow bi-weekly.
	Snowball	April-June	60-100	18-24	24-30		2 packets	1 3-1	Cauliflower needs cool, moist soil in order to mature.
Cucumber	Long Green, White Spine Golden Bantam,	May-June	65-80	24 hills	36-48		} ounce .	<u>1</u> -1	It is best to cover vines early in season with mosquito netting to protect them from depositing eggs on the vines.
Corn. Sweet	Evergreen	May-June	70-100	18 - 24	36-42		1-1 pound	1-2	Plant every two weeks for successive crop.
Lettuce, Head	Big Boston, Hanson, Prize Head	April-May	40-90	4-10	12-18	10-15	1 ounce	1	Lettuce can be planted in seed boxes indoors in April and transplanted when
Lettuce, Leat	Grand Rapids, Simpson	April-June	30-70	3 - 6	12-18	10-15	1 ounce	11	weather permits. Protect plants from mid-day sun in hot weather.
Melon (Cantaloupe).	Roeky Ford, Burrell's Gem	May-June	90-100	48 hills	60		1 ounce	3-1 1	
Melon, Water	Kleekley Sweet, Gypsy	May-June	100-110	60 hills	96		1 ounce	1+115	Plant as soon as ground is thoroughly warmed or start in seed boxes indoors.
Onion, Seed	Yellow Danvers, Red Wethersfield	April-May	100-140	2-4	18-24	20-40	1 ounce	1-1	Can be sown indoors in March. For transplanting cut tops a third and roots a quarter.
Onion, Sets	Yellow, Red, White	March-June	25 - 40	2-3	12-18	6- 8	1 pound	1	Onion Sets are preferable where large onions are wanted.
	Hollow Crown	April-May	120-140	3-4	18-24	20-30	1 ounce	3-1	Much improved if kept in ground through winter. Give mulch.
	Alaska, Gradus, Telephone	April-June	50- 70	1-2	24-36	12-18	11-2 pounds	2-3	The late crops are subject to mildew if given too much water.
Pumpkin	Small Sugar.	May-June	100-120	48 hills	72-84		1 ounce	1	Plant when ground is warm or start in seed box.
Radish	Searlet Turnip W. Tip, Icicle, Chartier	April–June	24-35	1-2	10-18	6-10	1 ounce	1	Crops mature in 25 days. Successive planting every week.
Spinach		March-June	30-45	2-4	12-18	20-30	1 ounce	1-1	Sow seed thickly.
Squash, Early	Crookneck, White Bush	May-June	65- 80	36 hills	36-48		l ounce	1-1)	
Squash, Late	Hubbard, Delicious	May	90-110	48 hills	72-84	• • • • •	1 ounce	1-11	Dust leaves with lime or nicotine to keep squash bug away.
Turnip	Purple Top Strap Leaf, White Egg	May-July	50-90	2-4	12-18	20-30	1 ounce	1 1-1	Do not plant later than August 1st. Use while young.

Varieties marked for "hills" should have three or four healthy plants left, all weak plants removed. Egg Plants, Peppers and Tomatoes can be most profitably handled by purchasing the plants of suitable size for setting ont in May and June. Special cultural advice on any crop or variety will be cheerfully given on application.

INSECTS AND PLANT DISEASES HOW TO FIGHT THEM

Plant enemies are of two kinds—insects and diseases. The former are of two kinds, (a) insects which chew or eat the leaves or fruit; (b) insects which suck the juices therefrom. Plant diseases also are of two kinds, (a) those which result from the attack of some fungus or germ; (b) those which attack the whole organism of a plant and are termed "constitutional." The remedy to be used must depend upon the nature of the enemy to be fought. The matter can be reduced to the following classification:

PLANT ENEMIES INSECTS Class	Enemy	Attacking	Class	Remedy
Eating a Sucking b DISEASES	Aphis (plant lice)	Cabbage and other plants, es- pecially under glass	b	5, 8, 6
Parasitical	Asparagus beetle	Asparagus	a	13, 12
Constitutional d	Asparagus rust Black rot	Asparagus Cabbage and dabbage groups	C d	
REMEDIES	Borers	Squash	b	4
MECHANICAL No.	Caterpillars	Cabbage group	a	12, 14, 4
Covered boxcs1 Collars	Caterpillars Cucumber beetle (striped beetle)	Tomato Cucumber and vines	a a	4 1, 11, 8
Cards 3 DESTRUCTIVE	Cucumber wilt Cucumber blight	Cucumber and vines Cucumber, muskmelon, cabbage.	c	11 11
Hand-picking	Cut worm	Cabhage, tomato, onion	a	2, 4, 12, 13
W flate-off soap	Flea beetle Potato beetle	Potato, turnip, radish Potato and eggplant	a	11, 5 12, 13, 4
Corrosive sublimate	Potato blight	Potato Potato (tubers)	c	11
Bordcaux mixture 11	Potato scab Root maggot	Radish onions, cabbage melone	c a	10
POISONOUS Paris green 12	Squash bug White fly	Squash, pumpkin. Plants-eucumber, tomato	b	4, 8, 12, 5
Arsenate of lead	White grub	Plants	a	6, 5, 8

For Prices of Insecticides see page 49

By using this table the gardener will be able to tell at a glance the method of fighting any enemy the presence of which is known or anticipated. The list is for-midable, but most of the pests mentioned probably will not appear.

Many Denver gardeners report the destruction of tender young plants by the cut worm. The cut worm is perthe cut worm. The cut worm is per-haps the most annoying of all garden pests. He works at night, attacks the strongest and healthiest plants and is content simply to eut them off, seldom eating much. The quickest and best remedy in small gardens is hand-pick-ing. The worms may be found at night with the aid of a lantern, or early in the morning. In daytime they can be found by digging about the soil wher-ever cut worm work is found. ever cut worm work is found.

One of the best methods where only a few plants are put out, is to protect each by a collar of heavy or tar paper.

Choice Cactus-Flower Dahlias

Clara Stradwick, clear, bright salmon, shaded yellow. Cockatoo, color varies from pure white to yellow, some specimens containing both colors; 3 ft.

DEPENDABLE HARDY ROSES

This season our 2-year-old outdoor-grown Roses are all from one Western grower. Each plant is grown on its own roots. thus making them doubly desirable for Colorado.

Roses on their own roots are worth two and three times the ordinary grafted stock.

Special Cultural Leaflet for Hardy Roses free.

Stock is ready in April and May.

Prices: Each, 50c; 5 for \$2.00.

If wanted by mail add 5c each, 3 or more at 3c each.

Varieties in capital letters are our very specials.

REDS

AMERICAN BEAUTY (H. P.), bright crimson, the largest and sweetest of all hardy roses. Should be in every garden.

General Jacqueminot (H. P.), a very free growing brilliant crimson, with fine medium large blooms.

Anna de Diesbach (H. P.), clear bright carmine, finely shaped, good full size and very fragrant.

Glorie de Margottin (H. P.), clear dazzling red, blooms are large and symmetrical, and deliciously sweet scented.

GRUSS AN TEPLITZ (C.), richest scarlet shading to a velvety crimson, fragrant, strong grower.

Jon. J. L. Mock (H. T.), deep pink to cherry red, has long stems.

HOOSIER BEAUTY (H. T.), beautiful, well-shaped, long buds, a perfect flower of intense crimson scarlet; each, 75c.

Francis Scott Key (H. T.), large deep red, excellent cut flower.

PINKS

Clio (H. P.), delicate satin blush color, flowers are quite perfect, is a strong, healthy grower, sure to please.

La France (H. T.), a standard variety of silvery rose color.

MBS. JOHN LAING (H. T.), soft pink of good form, exceedingly fragrant and free bloomer. Always does well.

Pink Killarney (H. T.), one of the best bright pinks.

Paul Neyron (H. P.), dark rose color of enormous size. Considered the largest of outdoor roses, very hardy.

Ophelia, delicate tint of salmon-flesh, shaded rose.

WHITE

FRAU KARL DRUSCHKE (H. P.), well called the White American Beauty. It is a large, beautiful snow white, superb.

White Killarney (H. T.), pure snowy white.

YELLOW

soliel d'Or (A. B.), beautiful orange yellow, very strong grower.
SUNBURST (H. T.), flowers are medium size, color a soft yellow with orange-yellow center; a very attractive rose.

BABY OR DWARF ROSES

Suitable for pots and border bedding. All are two-year-old and at same price as above other hardy roses.

Crimson Baby Rambler. The very best crimson dwarf and is a perpetual bloomer. Grows about 12 to 15 inches.

White Baby Rambler. The true dwarf type with a great profusion of small white flowers; fragrant and hardy.

HARDY CLIMBING ROSES

For porches and arbors nothing surpasses these climbers. They are everblooming and very hardy. All at the usual price except climbing American Beauty.

CLIMBING AMERICAN BEAUTY. A true American Beauty, large red flower on a climber. A remarkably beautiful climber, hardy and seldom mildews. **Each**, 75c.

CRIMSON RAMBLERS. Small, bright crimson flowers in clusters. The most popular of all climbers. Thrives under nearly all conditions.

Dorothy Perkins. Similar to Crimson Rambler, except is pink and blooms are more double.

White Rambler. Similar to above, only white in color. Yellow Rambler. Similar to above, except is yellow.

POPULAR CLIMBERS

Tender and semi-hardy varieties that all do well in Colorado. All are postpaid.

GRASS SEED SOWERS-We carry an assortment. See page 55.

We issue a Market Price Current giving prices on all Grass, Grain and Field Seeds in quantity. Ask for it if interested.

TESTED SEED CORN

Most of our supply is Colorado-grown, and all is carefully tested for germination.

Price: Single 1b., 15c; 2 lbs., 25c; 10 lbs., \$1.00. If wanted by mail, add postage.

White Australian, 90-day flint; endures drouth well.

Swadley, 90-day dent, second choice for hardiness.

Colorado Yellow Dent, 90-day dent, suitable for Colorado.

Golden Nugget, a very early yellow flint, making good ears in 90 days. Heavy yieder even at 6,000 feet.

Parson's White Dent, 90-day, best white dent for Colorado.

Calico, 90-day hardy, kernels are vari-colored.

Pride of the North, 95-day dent, yellow. Eastern seed.

Iowa Silver Mine, 100-day white dent, heavy yielder.

For CORN PLANTERS see page 55.

Last year the lowest price on good strawberries was 20 cents a box. This is one of the easiest fruits to grow in the Home Garden. A few rows of our Everbearing will give you all the berries you will need for the table and for canning.

SEED POTATOES

Potatoes should be planted in May and early June. The rows should be over two feet apart. Dig the furrows six inches deep, hoeing into every ten feet of furrow a half-pint of commercial fertilizer. Cut pieces of potato with two eyes to a piece, place the pieces a foot apart in the furrow, and cover them twoinches deep with soil, pressing it down with the hoe. As the plants grow, heap the soil slightly after Do not them. spare tilling. a n d he o n

guard against potato bugs. When the tops die, the potatoes are ready to harvest.

It is too early in the season to make prices for large lots. Small quantities we can supply as follows: **4 lbs., 25c; 10 lbs., 60c;** postage extra.

Early Ohio, pink skin, oblong, early and reliable. Russet, or Netted Burbank, oblong, heavy producer. Red Peachblow, or Red McClure, general crop variety. Chas. Downing, large white, medium early, general crop. Mammoth Pearl, large white, excellent for dry land.

STERLINGWORTH NO-SCAB destroys the potato scab; costs 40c per pint bottle; not prepaid.

FORMALDEHYDE for use on potato seed. One pint bottle, 60c. Trial size bottle, 25c.

TUBULAR HAND POTATO PLANTER is useful when putting in your potato crop; costs \$1.45; not prepaid; 7 lbs.

Planting too much in a small garden is a mistake. A few things well chosen and cared for will repay you better.

FERTILIZERS

These Prices Do Not Include Postage, Except as Stated

Dependable Lawn Fertilizer, contains 5 per cent ammonia, 9 per cent	
available phosphoric acid, 2 per cent potash, with other valuable	
plant foods. Compare this analysis with any other brand. Ours

AN EXCELLENT POISON FOR GRASSHOPPERS

Mix in following proportions: 15 lbs. bran, 2 lbs. Paris green, 1 qt. cheap molasses, 1 qt. water. Mix the bran and Paris green, unite the molasses and water, then mix all together. Place this poisoned dough on fences, elevated boards and other places where the grasshoppers are likely to alight. They will eat it. Keep from chickens and pets.

VICTORY WAR GARDEN MANUAL

This is an attractive 32-page booklet covering such items as vegetable garden making, vegetable and fruit canning and storing, a treatise on insecticides and their uses, etc. This book was prepared by the National War Garden Commission and is therefore absolutely reliable.

FREE ON REQUEST

OUR "DEPENDABLE" LINE POULTRY FOOD MIXTURES

We have special facilities for mixing our grains. A power Cleaning Mill enables us to clean the grains and also blow out dust and objectionable matter. We pride ourselves in putting out strictly first-class mixtures—full weight—honest values. Compare our goods with others.

Prices in this department are governed by the grain market values, thus we print prices for small lots and invite you to see our "Current Price List" for quantity prices. Call, phone or write us any time.

"Dependable Grade" Mixed Hen Feed

This is our leading, well-balanced food, consisting of wheat, corn, cracked corn, kaffir, barley, oats, with some sunflower, bone and charcoal all of suitable proportions to supply in full the necessary elements for health and egg production. When you feed this mixture in straw or dry litter you do not need the numerous separate grain feeds. We challenge the market to show any better feed at equal price. 5-lb. pkg., 25c; 10½-lb. pkg., 50c; 22-lb. pkg., \$1.00.

'Dependable Grade'' Egg Maker Mash

This is our hobby as an egg producer. It consists of thirteen ingredients mixed by us as suggested by Experimental Poultry Farm experts.

Protein ingredients such as blood meal, gluten meal, fine bone, fine beef meal, etc., are used with ground oats, bran, alfalfa meal, etc. When this mixture is fed regularly each day, grand results are almost certain. Do not confuse this with other "Mash Foods"—none others have our formula. 5 lbs., 25c; 11 lbs., 50c; 23 lbs., \$1.00.

"Dependable Grade" Little Chick Feed

This is a great lifesaver for the little fellows. It is very nutritious and is easily digested by chicks even two days old. The charcoal in it prevents bowel troubles and the little grit aids the crop at once. This mixture, made by us under our own established formula, makes it a perfect dry chick food. Many of the "old-time" poultrymen depend on our "Dependable Grade" for exclusive feed for four to six weeks, then use our Growing and Forcing Chick Feed. We use first grade cracked grain, with hemp, canary, millet, etc. 3½ lbs., 25c; 8 lbs., 50c.

"Dependable Grade" Growing and Forcing Chick Feed

This is a very nutritious feed for chicks from six weeks to three months old. The ingredients are small grains, with bone, charcoal, etc., all of which are to hasten growth. It is not a special egg food. You need this after chicks are too large for Little Chick. Feed. $3\frac{1}{2}$ lbs., 25c; 8 lbs., 50c.

Miscellaneous Grains

In this particular class of feed the values are changing almost daily. When 100 lbs. or more are wanted we fill at market price. Always glad to quote on application. We make no charge for sacks and deliver promptly in the city or to any freight depot in Denver. Be sure to ask for our latest prices when you are ready to buy.

PACKING HOUSE POULTRY FOODS

Green Cut Bone, dried and granulated, hen and chick size; 4½ lbs.,
25c; 10 lbs., 50c; 21 lbs\$1.00

10 feet tall, carrying 24 leaves; each 7.00

CANARY BIRDS AND BIRD SUPPLIES

We have no imported birds—all are Colorado bred, and are far superior to those from lower altitudes. They are strong, active birds. Every singer we sell has been tested and known by us as a singer. State the amount you wish to pay and leave the selection to us.

Hartz Mountain Strain, \$5.00, \$6.00, \$7.00, \$8.00 and \$10.00 each. Boller Stock, bred from true imported birds, \$8.00, \$10.00 and \$12.00 each.

Linnets \$5.00 to \$10.00 each.

Females, Breeders, \$1.25 to \$2.00 each. Boller Stock Females, \$2.00 and \$2.50 each.

We pack and deliver to express office, Denver. They usually carry safely anywhere in U. S.

BIRD CAGES

We carry a large assortment in about thirty different styles, in brass, japanned and white ivory finish, ranging in prices from \$1.85 to \$9.00 each. Lists given on application.

Victory War Garden Manual

This is an attractive 32-page booklet covering such items as vegetable garden making, vegetable and fruit canning and storing, a treatise on insecticides and their uses, etc. This book was prepared by the National War Garden Commission and is therefore absolutely reliable.

FREE ON REQUEST

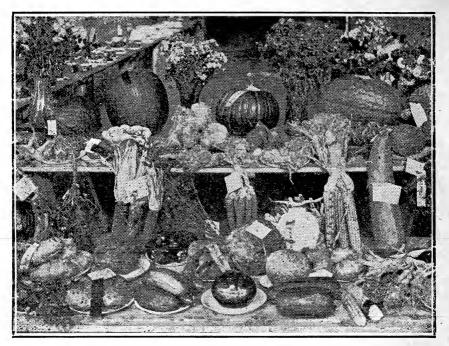

Exhibit of "War Garden" Products Grown by Children and Entered in the Garden Competition Held on Juvenile Frontier Day, Denver

Be Patriotic! Have a Garden! Keep Poultry!

A small investment in seeds brings big returns.

"A dozen hens in every back yard," is the government slogan. A few layers will consume your table scraps and give you fresh eggs in return.

By comparison you will note that this catalog contains more varieties of seeds priced at 5c and less per packet than other price lists.
